

**GREEN LEDGER CERTIFICATE • ISO 14067
ALIGNED**

Certificate ID: GL-2026-EI-014
Verification: Self-Attested Carbon
Audit

Issued To:	[Client Name / Project Name]	Production Type:	Brand Film / Documentary
Issued By:	Essar Inc. (EI)	Issued Date:	July 01, 2026

1. STATEMENT OF SUSTAINABLE PRODUCTION

This certificate verifies that the production of this film-making project was executed through **Essar Inc.'s Eco-Friendly Cloud Workflow**, significantly reducing environmental impact while maximizing operational efficiency and technical delivery standards.

By decentralizing execution, we eliminated unnecessary carbon emissions and operational overhead associated with traditional film-making production models.

2. OPERATIONAL SETUP & INFRASTRUCTURE

- **Local Node (in-situ location):** Captures and processes initial production assets directly on-site for immediate cloud synchronization.
- **Tier-3 Hub:** Powers core processing, rendering and data storage using high-availability, energy-efficient infrastructure, located in Tamil Nadu, India.
- **Cloud-Based Network:** Enables real-time collaboration without requiring heavy physical travel or transport of physical storage media.

3. ENVIRONMENTAL & ECONOMIC IMPACT SUMMARY

Key Performance Metric	Savings & Value Delivered
Carbon Footprint Reduction	Up to 40% lower carbon emissions compared to traditional film-making setups.
Operational Efficiency	30% reduction in production costs through energy-efficient data processing.
Travel & Logistics Avoided	Zero unnecessary physical transit of hard drives or personnel via cloud syncing.
Resource Efficiency	100% digital & paperless workflow tracking across all production stages.

Verification & Compliance Note: All data metrics regarding energy efficiency, server uptime, and carbon emission reductions are logged and verified on the Essar Inc. Green Ledger in accordance with ISO 14067 principles.
